coat protein VPI - mink enteritis virus (strain Abashiri)
N;Contains: coat protein VP2
C;Species: mink enteritis virus, MEV
C;Species: mink enteritis virus, MEV
C;Date: 30-Jun-1992 #sequence_revision 30-Jun-1992 #text_change 09-Jul-2004
C;Accession: B38350
R;Kariatsumari, T.; Horiuchi, M.; Hama, E.; Yaguchi, K.; Ishigurio, N.; Goto, H.;
J. Gen. Virol. 72, 867-875, 1991
A;Title: Construction and nucleotide sequence analysis of an infectious DNA clone A;Reference number: A38350; MUID:91202123; PMID:2016597
A;Accession: B38350
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    RESULT

Coat protein VP1 - porcine parvovirus
N;Contains: coat protein VP2
C;Species: porcine parvovirus
C;Species: porcine parvovirus
C;Accession: B33302
C;Accession: B33302
C;Accession: B3302
C;Accession: B3302
A;Renz, A.I.; Manclus, J.J.; Diaz-Aroca, E.; Casal, J.I.
J. Gen. Virol. 70, 2541-2553, 1989
A;Title: Porcine parvovirus: DNA sequence and genome organization.
A;Accession: B33302
